Gampa Sathwik

gampasathwik2220@gmail.com — LinkedIn — GitHub

Information Technology undergraduate at VNR VJIET specializing in building scalable full-stack web applications, real-time systems, and clean backends. Passionate about algorithms, performance, and writing production-ready code.

Education

VNR Vignana Jyothi Institute of Engineering and Technology Hyderabad, India
B.Tech in Information Technology Expected 2028

- **Relevant Coursework:** Data Structures & Algorithms, Object Oriented Programming (OOP), DBMS (Database Systems), Operating Systems, System Design

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, Solidity, C, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Socket.IO, Ethers.js, Zustand

Databases & Tools: PostgreSQL, MySQL, SQLite, Redis, MongoDB, Firebase, Git & GitHub

CS Fundamentals: Data Structures & Algorithms, Object Oriented Programming (OOP), DBMS, Operating Systems, System Design

Technical Projects

College Bus Tracking & Attendance Management System *React.js, Node.js, Socket.IO, Redis, SQLite*

Team Project

- Built a real-time transit tracking and automated student attendance management system to prevent proxy records.
- Utilized **Socket.IO** and **Linear Interpolation (LERP)** to stream smooth real-time GPS coordinate updates on a **Leaflet.js** map.
- Integrated a **Redis** caching layer with the SQLite database to speed up load times and handle rapid telemetry data.

Cynx-YouthLink (Mental Health Ecosystem) *FastAPI, Node.js, PostgreSQL, WebSockets*

Team Project

- Recognized as a **Top Performer at the CVR Hackathon** for developing a digital mental health outreach platform.
- Engineered an automated emotional triage model hosted on a **FastAPI** backend with WebSocket support for real-time encrypted messaging.
- Built a custom **"Safety Switch"** instant privacy feature redirecting to Google via Ctrl+Q key triggers.

Decentralized Freelance Payment & Escrow Platform *Solidity, Ethers.js, MetaMask*

Team Project

- Developed a Web3 freelance escrow platform using **Solidity** smart contracts deployed to the **Sepolia Testnet**.
- Programmed contract logic to securely lock funds and manage transaction states (Created, In Progress, Completed, Disputed, Refunded).
- Connected frontend to the Ethereum ledger using **Ethers.js** and integrated MetaMask wallet authentication.

Achievements & Events

- **Competitive Programming** – Active participant in global coding contests, achieving a LeetCode Max Rating of 1412 and CodeChef Div 4.
- **Open Source** – Maintainer and contributor on GitHub with 200+ commits and contributions.
- **Hackathon Top Performer** – Recognized as a top performer at the CVR College Hackathon for building the Cynx-YouthLink platform.

Certifications & Simulations

- **Oracle Certified Generative AI Professional** – Professional certification validating AI concepts and solution design.
- **Cybersecurity Job Simulation** – Completed the AIG Cybersecurity simulation workflows mapping practical engineering safeguards.
