GAMPA SATHWIK

gampasathwik2220@gmail.com | +91-8897766640 | GitHub | LinkedIn

Summary

Information Technology undergraduate who enjoys building reliable, scalable full-stack applications. Comfortable across the stack — backend APIs, databases, and modern frontend frameworks — with a growing interest in AI-powered and agentic systems. I like shipping clean, production-ready code and picking up new tools quickly.

Education

- **VNR Vignana Jyothi Institute of Engineering and Technology** Hyderabad, India
  Bachelor of Technology in Information Technology — CGPA: 8.6/10 *Expected 2028*
- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, SQL, Solidity, C
- **Frameworks:** React.js, Next.js, Node.js, Express.js, FastAPI, Socket.IO
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB, Firebase, Redis
- **Developer Tools:** Git, GitHub, REST APIs, Ethers.js, MetaMask, Zustand, Leaflet.js
- **AI & Agentic Systems:** Google Gemini API, Multi-Agent Architectures, Turborepo, Speech UI
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Projects

- **FounderHQ — Autonomous AI Operating System for Startups**
  Next.js 15, FastAPI, Google Gemini, Turborepo
  - Built an enterprise-grade AI Operating System with hierarchical multi-agent architecture, centralizing startup operations into an autonomous CEO Planner agent.
  - Engineered specialized sub-agents for Finance, Legal, HR, and Growth executing tasks autonomously under planner orchestration.
  - Implemented persistent memory retention and real-time speech interactions across Next.js frontend and FastAPI backend in a Turborepo monorepo.
- **College Bus Tracking & Attendance Management System**
  React.js, Node.js, Socket.IO, Redis, SQLite
  - Developed a real-time transit tracking and attendance platform with REST API and Socket.IO layer.
  - Implemented GPS coordinate interpolation with LERP and Leaflet.js for smoother map movement.
  - Optimized telemetry retrieval using Redis caching over SQLite, reducing repeated database reads.
- **Resume Matcher & Job Scraper**
  Java (JDK 11+), Pure-Java HTTP Server
  - Built a zero-dependency resume-to-job matching pipeline entirely in pure Java, from live job scraping to keyword-based scoring.
  - Implemented a custom HTML parser and stopword-removal pipeline for cleaner keyword extraction.
  - Designed a REST API (/match) computing cosine similarity between resumes and job posts with keyword-gap analysis.

Achievements & Certifications

- Best Performer in a Hackathon (Cynx-YouthLink) — recognized at the CVR College Hackathon for a mental-health outreach platform with real-time messaging.
- Competitive Programming: Active LeetCode & CodeChef participant; max LeetCode rating of 1412.
- Open Source: 200+ commits across GitHub projects using collaborative version-control practices.
- Certifications: Oracle Certified Generative AI Professional; AIG Cybersecurity Job Simulation.
